

Senior Engineer

Samsung Electronics UK

1 visible recommendation for this position: [Edit](#)

"Enver worked with me as a professional and very capable senior software engineer. Highly experienced, he thinks wider than the task at hand, taking a creative approach to problem solving. He was able to jump into existing code bases quickly and get a quality job done, working well with colleagues at all levels. I would strongly recommend Enver and we would definitely work with him again in the future." February 9, 2010
